

If You Can Dream It, We Can Build It.

For more than thirty years Boss Display Corporation has been producing quality interactive exhibits for children's museums and science centers all over the United States and in many cities abroad. Our mission is to offer much more than amusement park entertainment. We have designed and built fun, interactive, durable, and safe exhibits which challenge children intellectually and physically. We help facilitate learning through true scientific exploration and experimentation.

Distinguishing us from our competition is our talented staff. Boss Display boasts a staff of twenty-five gifted industrial designers, engineers, machinists, welders, carpenters, electrical engineers, painters, and sculptors. Our skilled workers and their interdisciplinary strengths give our corporation a fusion of knowledge and framework for excellence unsurpassed in the industry. Our talented engineering staff has put Boss Display on the map as one of the few firms in the world with extensive experience in the creation of custom water environments.

Boss Display is located in a 26,000 square foot production facility in Columbus, Ohio. Just beyond our design department and full service graphics area, sit the various shops where ideas become reality. Always whirling with activity are our wood and plastic mills, metal fabrication, electrical, audio visual, and shipping departments. While our production facility is fully functioning and well equipped with state-of-the art machines, our tenured employees are still our greatest assets. The average tenure for our employees is over 13 years.

To bolster our exhibitry, Boss Display collaborates with specialized vendors. Our combined efforts allow us to offer clients a superb finished product. Our business partners powder coat metals, laser cut thick slabs of stainless steel, water jet chunks of aluminum, custom bend tubes, acid etch zinc plate, vacuum form styrene, precision bend sheets of metal, injection mold parts, chrome plate metals, and print graphics up to eight feet wide. We have been working with many of these vendors for decades, so we know they produce to the exacting level of quality we require.

Our goal at Boss Display is to wow both our clients and their patrons through superb exhibitry. We strive to engage the audience and attract repeat visitors, while honoring the educational and business objectives of our clients and delivering far more than what they expect.

Satisfaction guaranteed, ease of installation and maintenance is important to Boss Display. We always plan ahead so our exhibitry can be mounted with few on-site modifications. This helps eliminate delays and disruption – an enormous benefit for our clients. Because our builders are also our installers, even our largest exhibits can be set up quickly and with minimal effort. Boss Display assumes all responsibility for well-packed, well-shipped products, delivered on time and professionally installed.

Clients select Boss Display for our attention to quality and detail, our innovative engineering and our competitive pricing. We have a proven ability to always deliver on time and within budget. The majority of our work comes from referrals so our success as a business ultimately depends on our reputation for excellence.
